NEW GENERATION WIRELESS ALARM SYSTEMS

PERFECT SOLUTIONS FOR SECURING YOUR PROPERTY

2018

We are Lithuanian technology company that has been developing professional home security solutions **for over 12 years and our brand is represented in 70 countries.**

Our mission is to make installation easier for our clients by creating installer-friendly, intuitive and value-for-money products. We specialize in wireless security solutions - our latest products reach up to 3 km in open areas. It ensures fast and smooth functionality in premises up to 300 m². Our goal is to become Your number one choice for installations.

WHY CHOOSE US:

INSTALLER-FRIENDLY SOLUTIONS

Our team constantly analyzes ideas and requirements of installers to turn them into a reality. Eldes Utility is intuitive and installer-friendly tool which boosts the installation time by 50%! Additionally, the software allows to remotely configure a security system, eliminating a need to be in the location.

HIGH EUROPEAN QUALITY

High European quality is one of many reasons why installers all over the world choose us. All of our products are assembled in Lithuania. Before we send the products to our clients, we thoroughly test them to ensure long-term and smooth functionality.

WIDE VARIETY OF PRODUCTS

With our range of products You will be able to offer various home security solutions and protect homes of the most demanding end-users. The newest alarm panels ESIM384 and Pitbull Alarm PRO can be expanded with our new generation wireless keypads, motion, temperature and flood sensors, sirens, door contacts etc. Our solutions will ensure the highest level of home security.

Our security solutions meet CE and EN 50131 (Grade2) standards
